

Are you faced with a lightening pace and challenges managing your surgery scheduling?  
 Do you seek an efficient method to manage your resources and share data?  
 Are you interested in supporting sales representatives in remote locations?

sTrack™ was developed in conjunction with Pacific Orthopaedics, Inc. to meet the needs of industrious DePuy distributorships. Combining both pre- and post- surgery scheduling, sales team tracking, and information resources, sTrack™ enables control over the full flow of your system operations. More, sTrack™ is a web-based service, which means that you have no software to install, no headaches from different computers, and more time to concentrate on the important aspects of your business.

**SCHEDULE** allows you to fluidly manage the cycle of surgery scheduling - including surgeon management, schedule details, inventory ordering, and all required forms. sTrack™ gives you the ability to:

- Schedule surgeries online, where all data is shared
- Track and view all changes to any given surgery
- Sort scheduled surgeries by date, sales team, location, facility, inventory items, or surgeon
- Track POs, Usage Sheets, and DER forms associated with each surgery
- Submit DER to DePuy electronically
- View previously submitted DER forms
- Manage all surgeon data, including surgeon specialties, CV, and notes
- Sort surgeon data in order to generate mailing labels for sales promotions
- Place and track consignment orders
- Quickly cancel or reactivate surgeries

DFY Solutions wishes to ardently acknowledge Pacific Orthopaedics, Inc. for allowing us to use their website for screen shots as well as for the demo site. Our most sincere appreciation to Tom and Barbara Eiguren.

In addition to the powerful surgery scheduling and inventory features, sTrack™ includes the following additional benefits which make for a full information gateway:

**GRANTS** serves to streamline the DePuy contributions cycle. Grants are written, edited, and discussed online until they are submitted electronically to DePuy. More, sTrack™ retains electronic copies of all grants and their results.

**ROSTER** displays office locations plus all employee data in a format that can readily be accessed and printed. Suddenly employee contact data is available over all mediums!

**FORMS & BENEFITS** serve to allow Human Resources to post all employee-related information, including (but not limited to) an overview of benefits, employee forms (e.g., Dental Enrollment), and links to benefit providers (e.g., medical/dental). It also enables employees to upload forms directly back to HR.

**LINKS & NEWSLETTER** display categorized links to documents and websites. sTrack™ gives you the ability to create and order your own link categories, provides external links complimented with textual references, and displays and archives company newsletters.

**FEEDBACK** grants a flexible data analysis tool. Surveys can be used to garner employee input about the website, to propose a new product, or anything else you desire. With sTrack™, you can easily create surveys - including adding a photo and link - and capture and analyze results.

**ADMIN – THE ULTIMATE POWER TOOL** provides a full content management utility, thus fundamentally enabling you to manage the website independently.

**EVEN MORE IMPORTANT: SECURITY** is inherent in the system. Our services include a nearly-real-time backup of your website data, which is copied to a designated server every ten minutes. This incredible feature gives you unprecedented data protection.
